

Public Courses 2009

New Public Courses Announced

To fulfil a growing need from our clients we are pleased to announce our new public schedule for 2009. Not only have we continued to build on the courses offered at Clawthorpe Hall Business Centre but we have teamed up with another local training provider to offer our services alongside theirs.

The Lakes Training Services in Kendal are an established provider of construction industry health and safety training. Recognising a shortage of training courses available for their existing clients, Lakes Training asked CBH to help.

We are more than happy to get involved and via our network of professional trainers can help clients improve their IT skills, manage their finances or help manage complex projects.

Full details of the courses available can be found on our [events](#) page.
